

Facilities Solutions Group Accelerates Shipping, Solves Dimensioning Challenge with Size-IT

Looking for a Fast, Flexible Dimensioning Solution

Facility Solutions Group, ([FSG](#)) is one of the nation's largest single-source providers of lighting and electrical products, electrical services, electrical construction and energy management solutions. With a successful 33-year history of serving customers, FSG develops, designs, markets, sells and supports all types of lighting, electrical, control, and energy-saving products and services.

When FSG's parcel carriers announced rate changes that would require package dimensions on all of the company's shipments, the fulfillment process slowed down. Andrew Wimmer, Logistics Manager for FSG, began looking for a solution that would make it faster and easier for his staff to capture accurate dimensions and keep the shipping line moving.

"Once the changes in dimensional freight rates were announced by UPS and FedEx, FSG made the decision to begin 'right sizing' our boxes for every shipment," Wimmer said. "This meant our operations staff was suddenly measuring and manually typing in the dimensions for every package." Wimmer tried dimensional scales but they weren't a fit. "They were bulky, cost thousands of dollars more and had a dimensional

limit which we'd frequently go over, so our shipping department was still processing shipments the old way."

Size-IT Cordless Scanner and Dimensioner Fits the Bill

Wimmer then discovered Size-IT, ADSI's mobile cordless dimensioner and barcode scanner.

He liked its compact size, ease of use, and the fact that he could capture dimensions on virtually all of FSG's shipments without hitting a dimensional limit.

"Size-IT has made a considerable change for the better to our shipping department," he said. With the Size-IT unit, we've increased accuracy and efficiency for each package. We're able to process shipments more quickly and accurately without worrying about it dim'ing out. Also, because Size-IT is a flexible handheld device, we didn't have to allocate space in our warehouse for a bulky piece of equipment. It is the perfect fit for FSG."
