

BECOME A CUBETAPE PARTNER

DHL deploys Game-changing Cubetape in Europe BECOME A CUBETAPE PARTNER

Reseller partner

It's rare that a new opportunity – a 'next big thing' – comes along. The all-new Cubetape is THAT opportunity!

A European market leader in its former form, Cubetape is taking the US by storm.

If you are engaged in the transport and logistics (T&L) market and have existing customer relationships in the freight industry, contact us NOW about opportunities to become a Cubetape reseller!

With Cubetape your customers will be able to quickly and effectively integrate 'mobile dimensioning' – the worldwide standard for measuring freight now in the US - into their workflows.

Millions of users and hundreds of thousands of companies represent a huge opportunity for you!

Parceltools understands building a relationship with the right vendor isn't just important – it is vital! We will provide you with all the tools and support necessary to become a robust, profitable and long-term reseller of Cubetape.

Cubetape is a proven mobile product which complements your current T & L focus, increases your value proposition to your customers, opens a new sector in dimensional weighing and gives you a new profitable market to address. As our reseller, we commit to:

- Manage our network to limit distribution to true 'value-add' partners. We don't want 'box-shifters' – and nor do your customers.
- Not to sell Cubetape through mass-distribution
- Not to sell Cubetape to resellers without core competencies in the T&L sector

If you want to grasp the opportunity of dimensional weighing, then contact us now and we will be in touch to tell you more.

CubeTape® is all you need
